

# Touchscreen & Audio System Removal – Safety and Procedure Guide

## Important Notes:

- Always wear anti-static gloves when handling electronic components.
- Store removed screws and parts in labeled containers to ensure efficient reassembly.
- Reconnect the negative battery terminal only **after** all installation or reinstallation procedures are complete.

## 1. Safety First – Battery Disconnection

Before beginning any disassembly or installation, it is critical to ensure electrical safety.

### Steps:

1. **Disconnect the vehicle's battery** to prevent any electrical issues or short circuits.
2. **Fold down the rear seats** to access the trunk area.
3. **Open the trunk.**
4. **Remove the carpet** above the battery compartment.
5. **Using a 10mm socket**, loosen the nut securing the **negative battery terminal**.
6. **Disconnect the negative cable** from the battery.
7. **Ensure the trunk remains open** throughout the entire procedure to prevent being locked out.

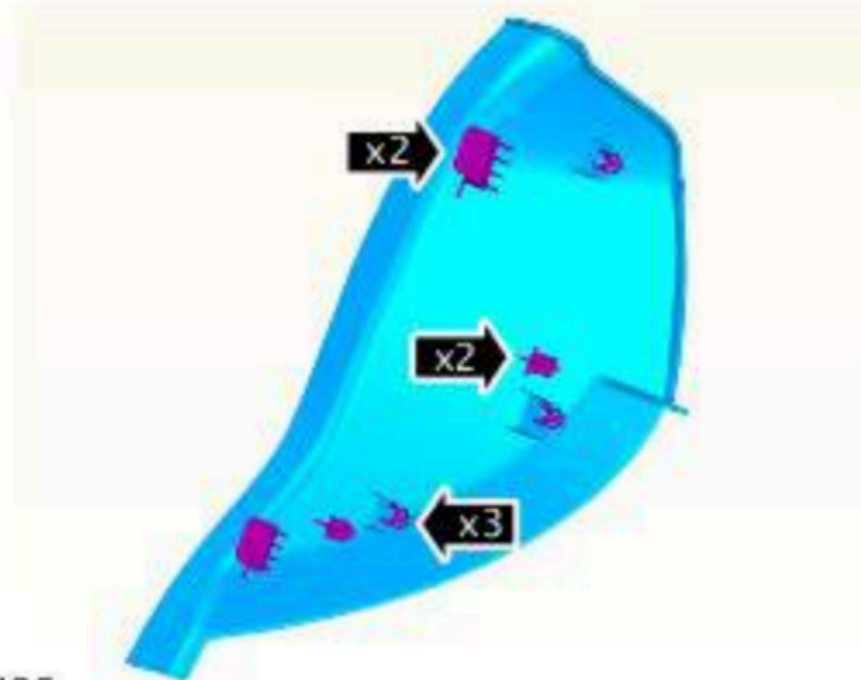

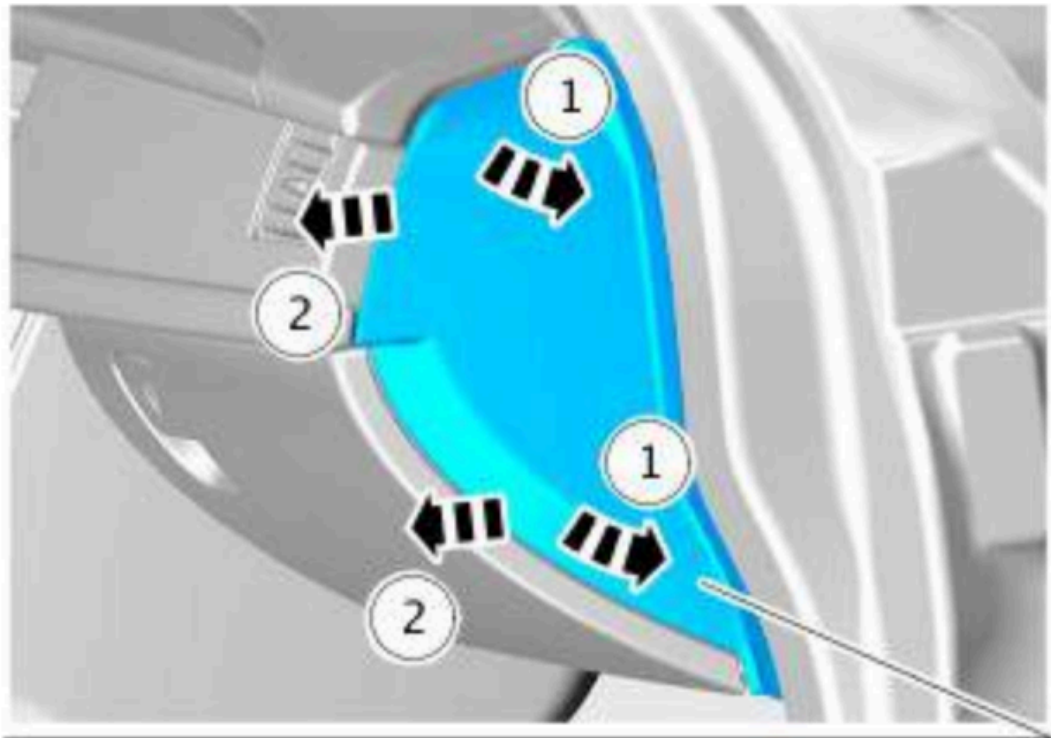

## 2. Uninstall (2.1 -> Integrated Control Panel, 2.2 -> Touch Screen, 2.3 -> Audio Head Unit)

1. Remove the **door seal** on the relevant side.

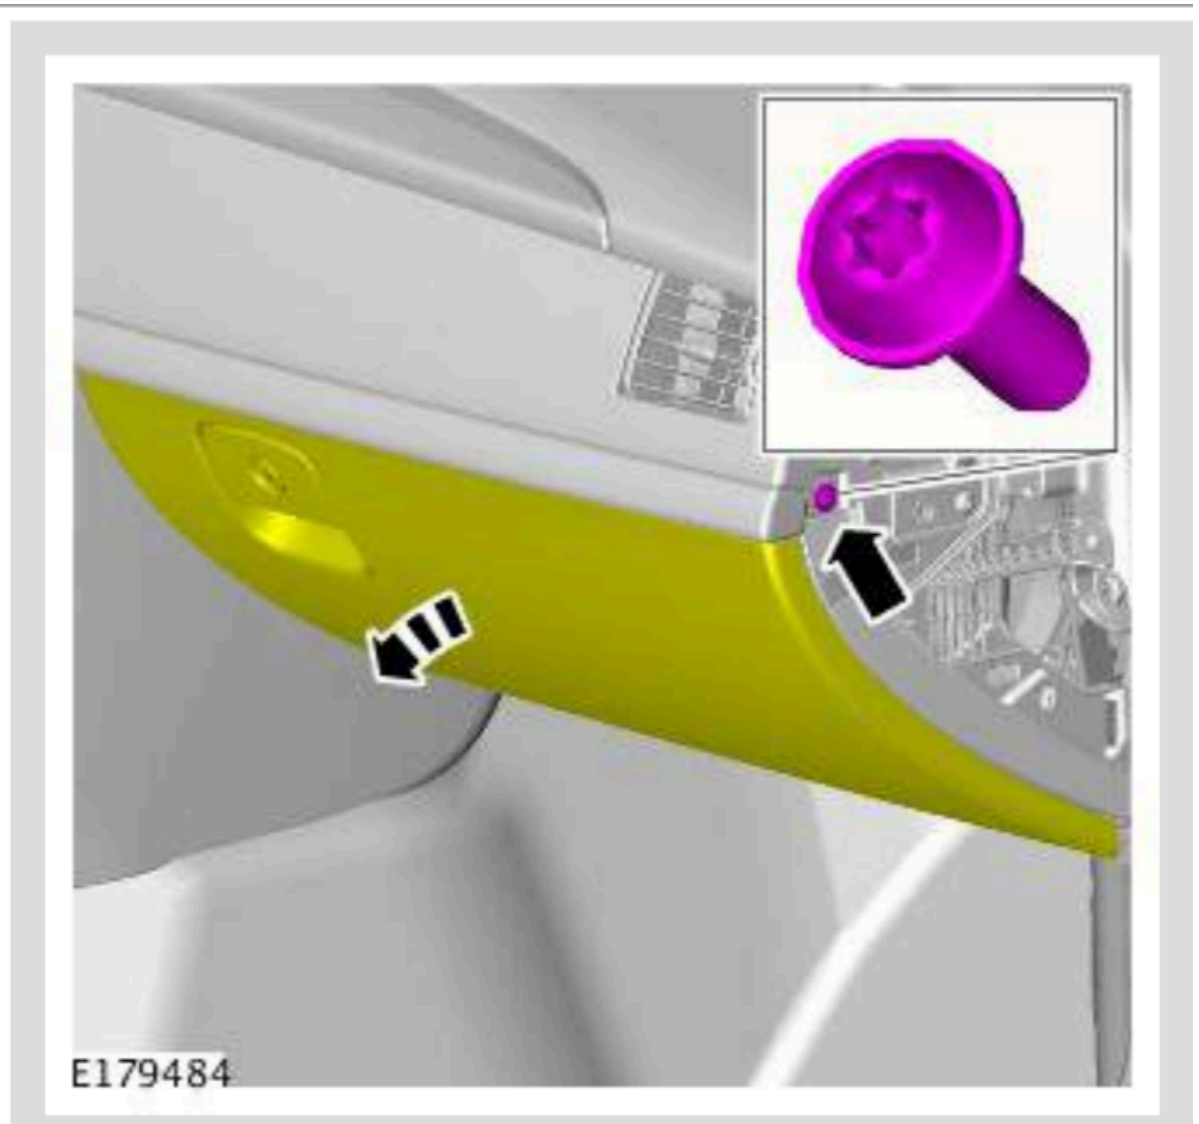

Position the door seal to one side.

2. Remove the instrument panel side trim panel.

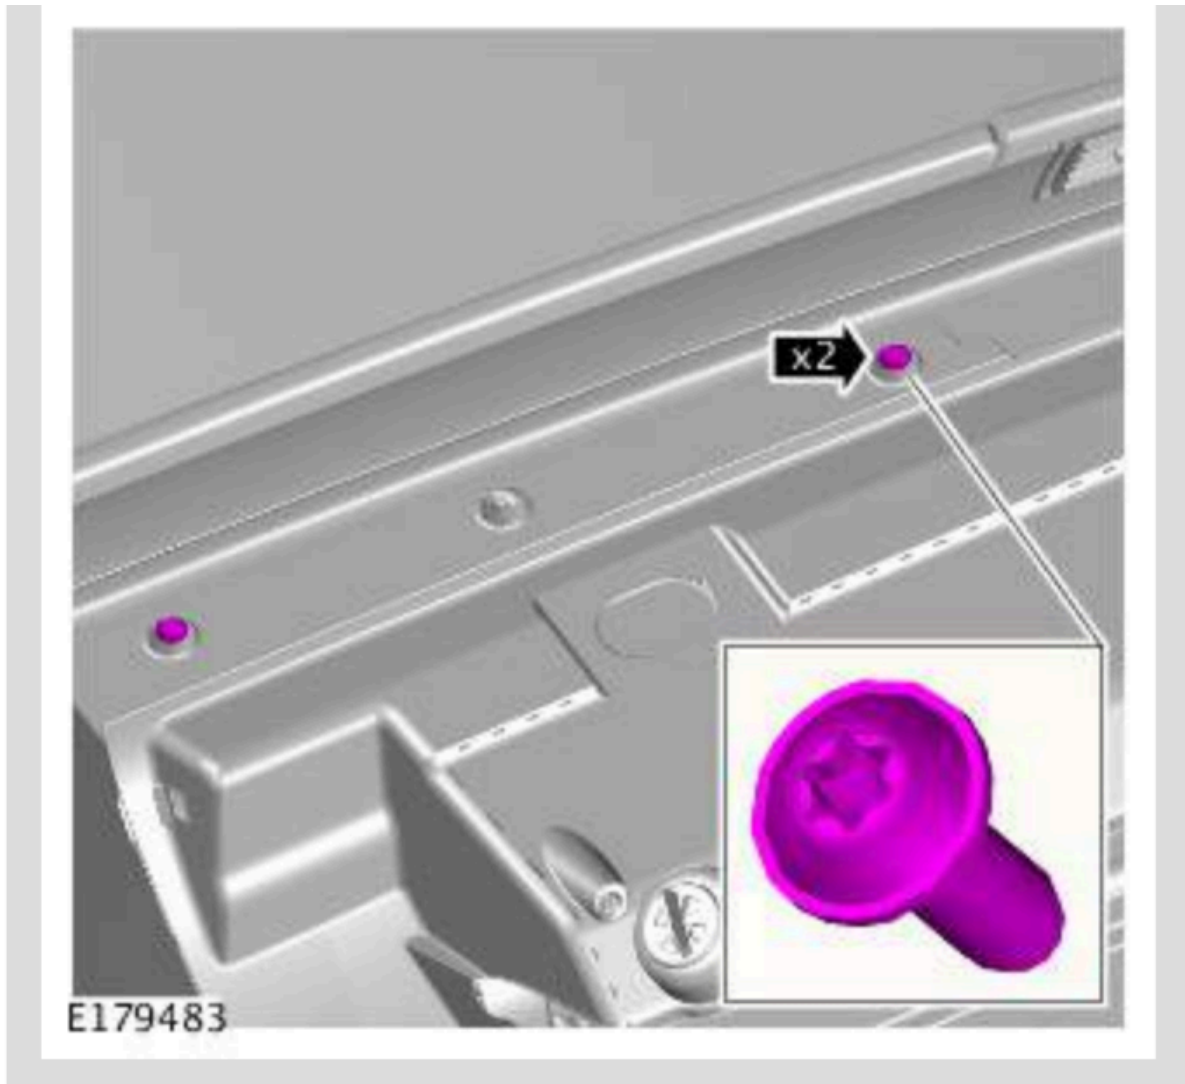

E179486

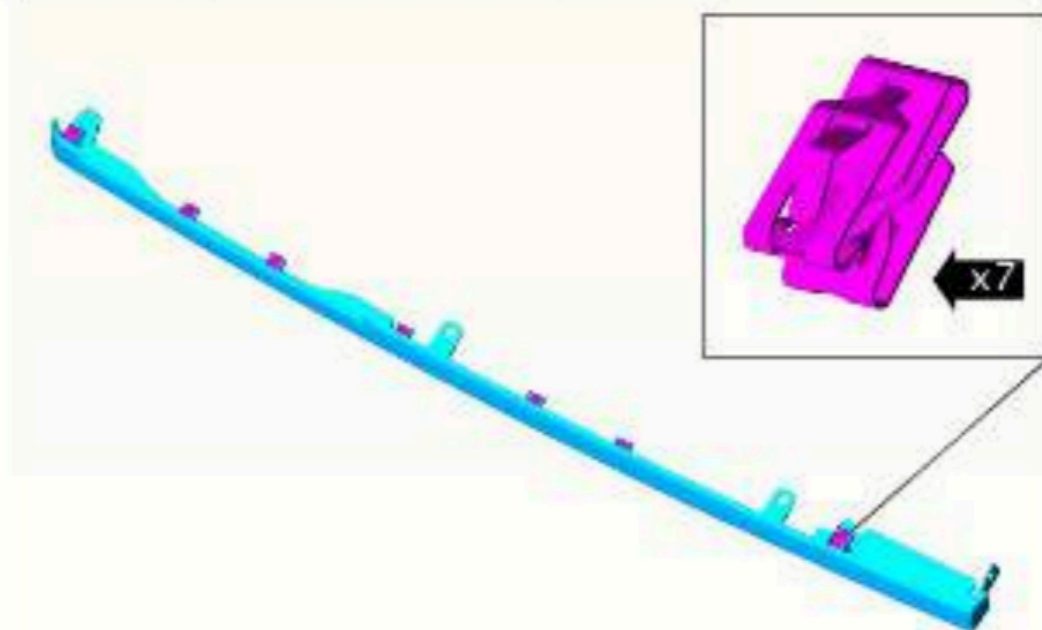

3. Remove the retaining screw. Lower the glovebox.

4. Remove the **2 retaining screws** from the **lower trim panel** (Torque when reinstalling: 2.5 Nm).

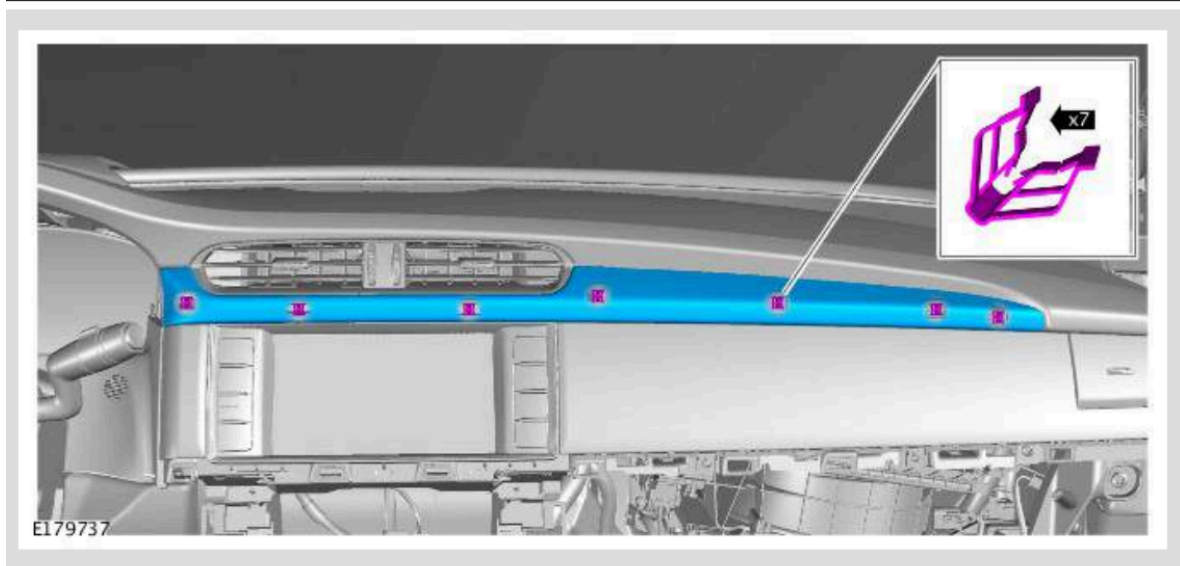

5. Remove the **lower trim panel**.

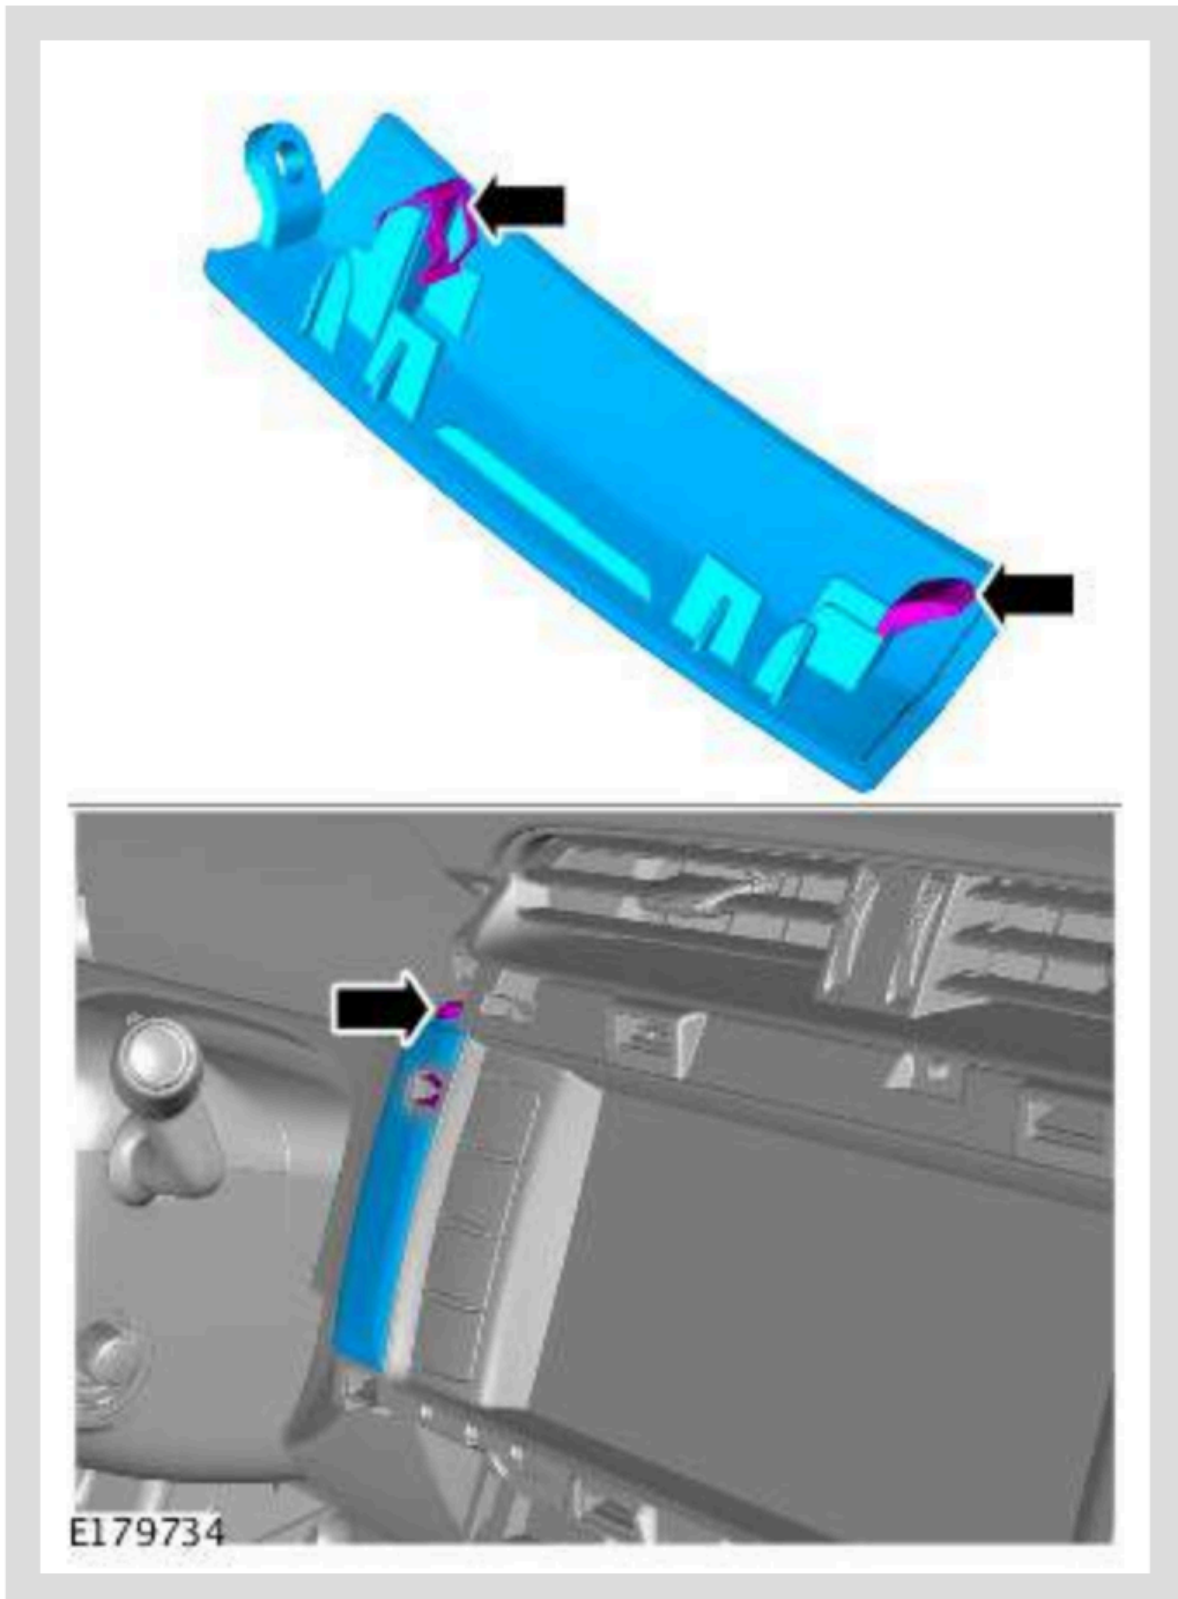

E179487

6. Remove the **upper trim panel**. There are no screw on upper trim panel

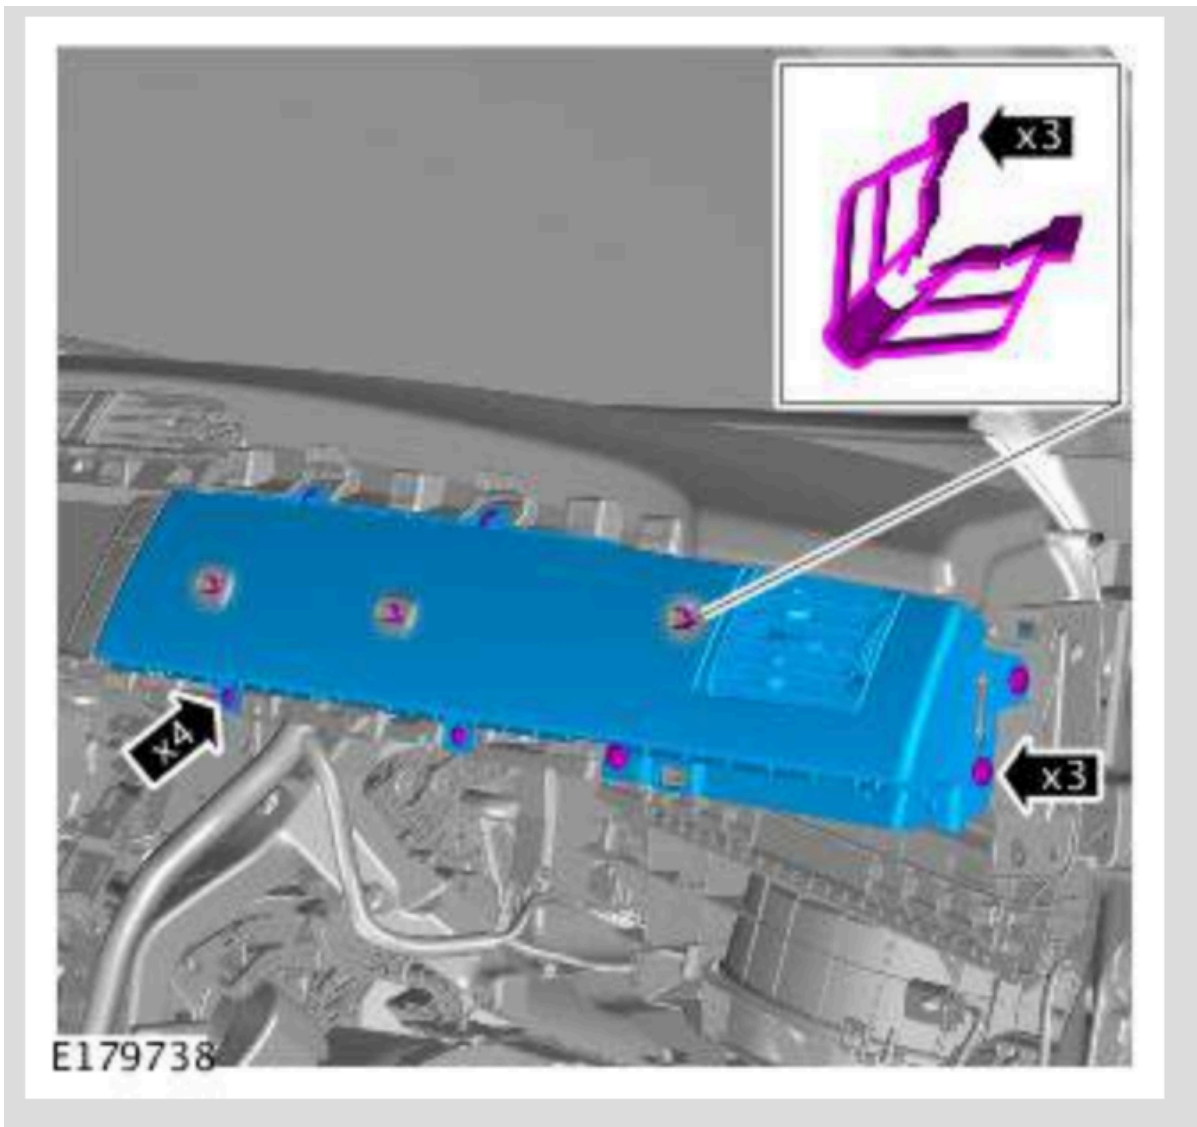

7. Remove the **Side trim panel retaining screw** (*Torque when reinstalling: 2.5 Nm*).

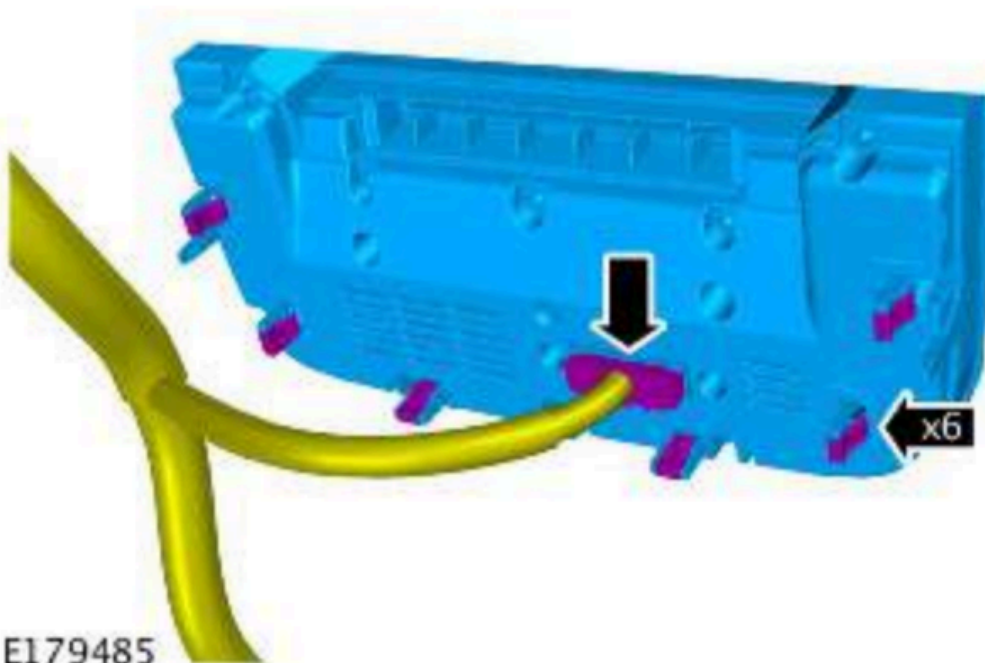

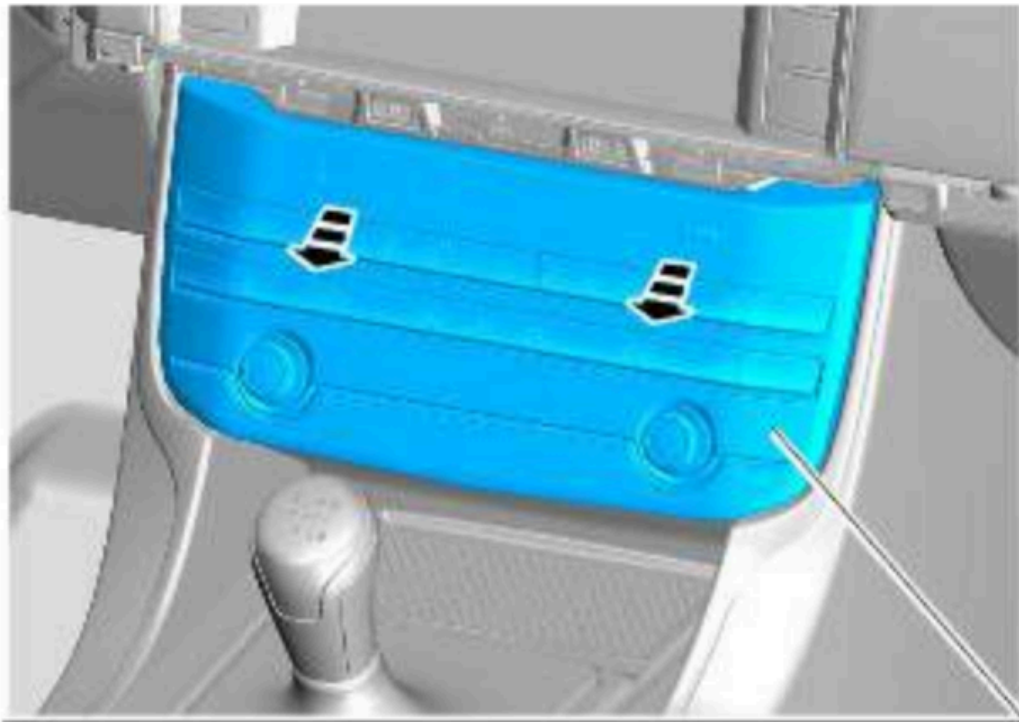

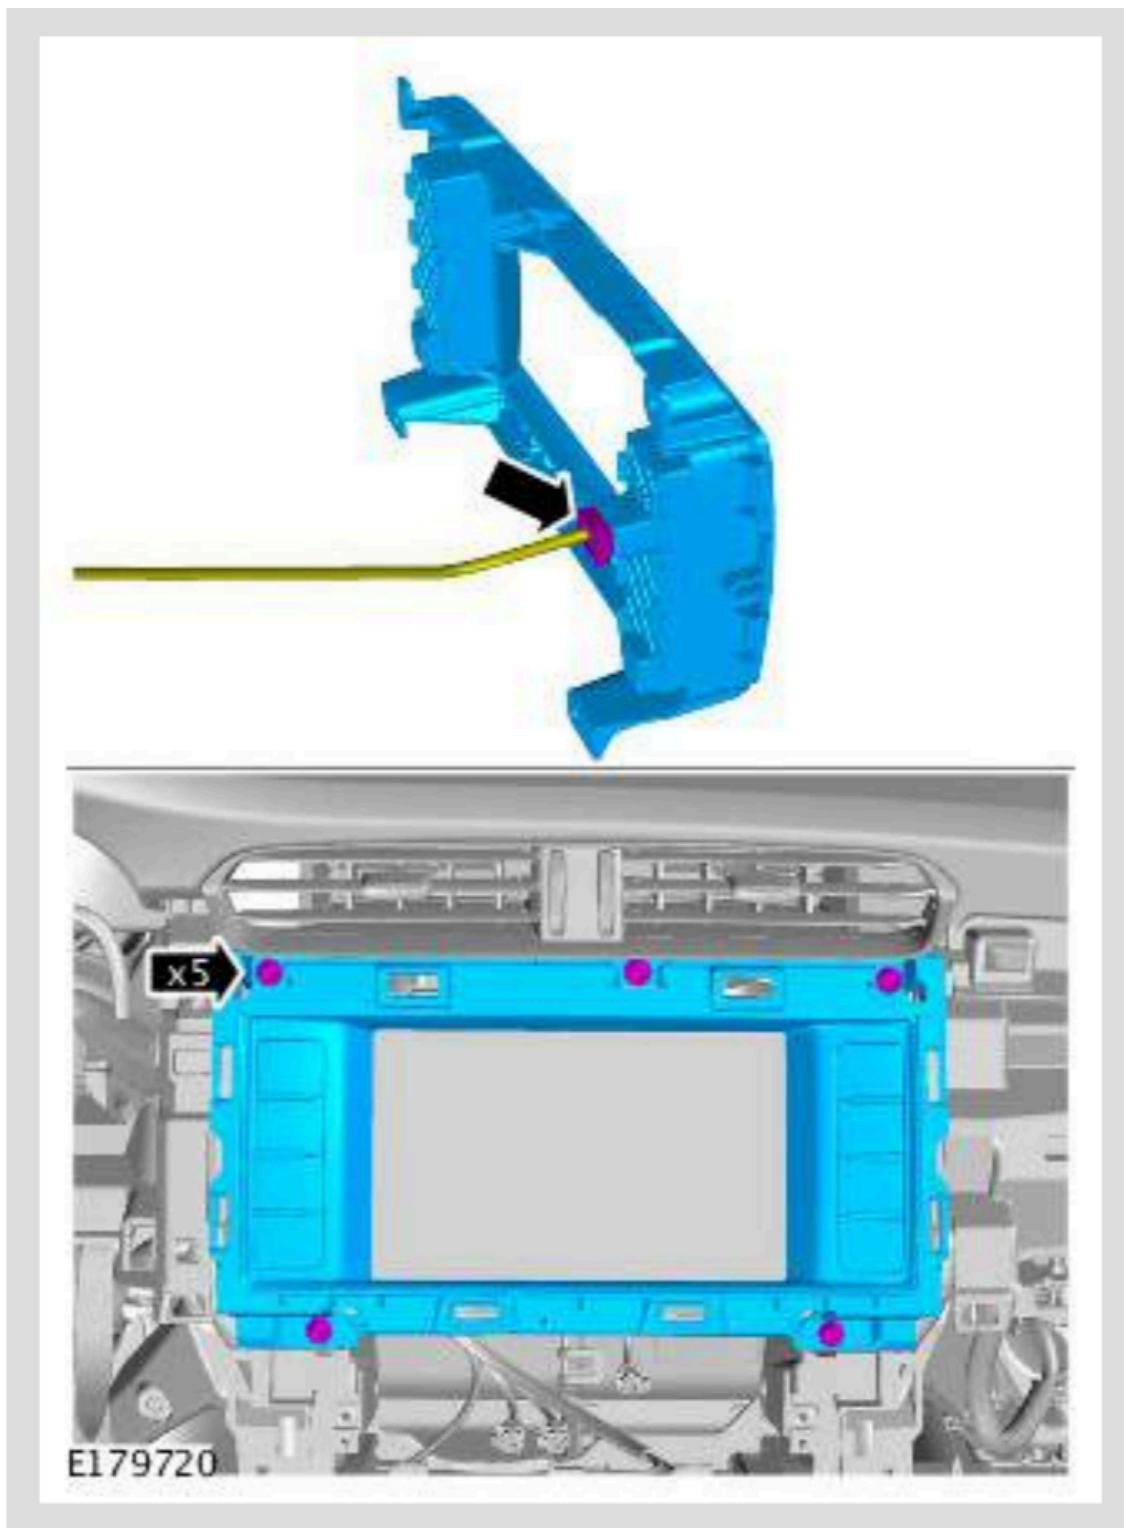

8. Remove the **middle trim panel** and its **7 retaining screws** (*Torque when reinstalling: 2.5 Nm*).

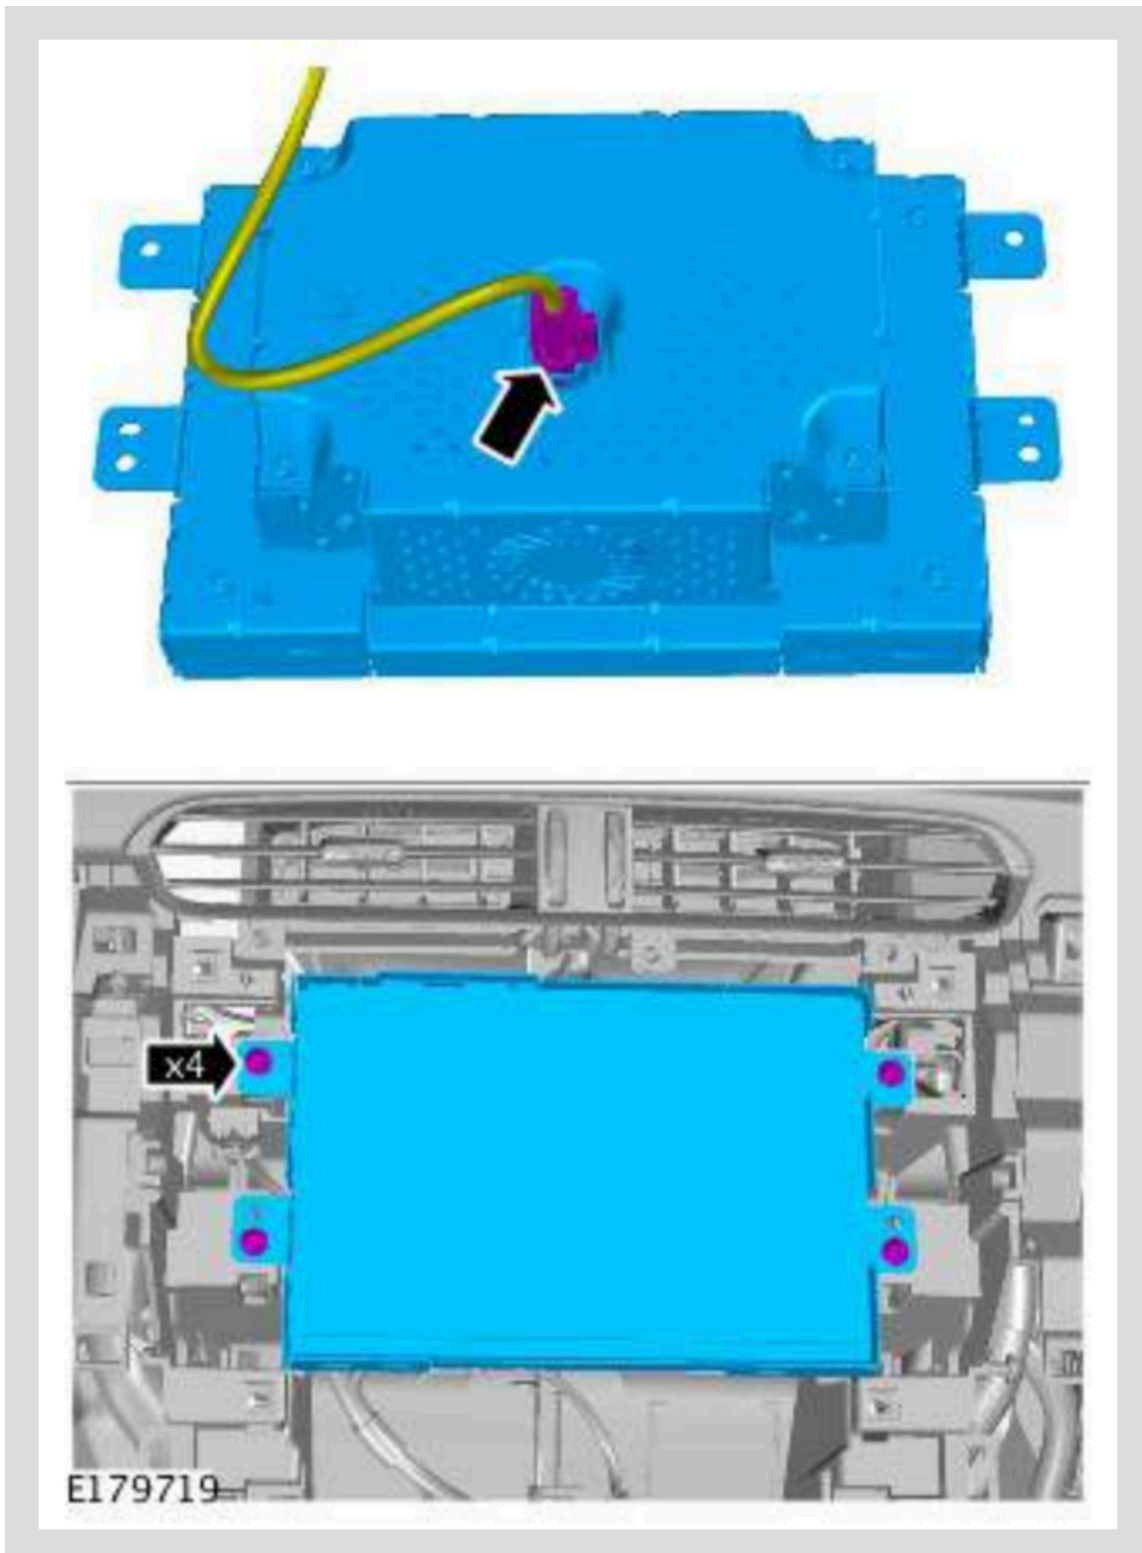

## 9. Remove the integrated control panel

**10. Remove the 5 retaining screws.**

11. Remove the **touchscreen switchpack trim panel** (*Torque when reinstalling: 2.5 Nm*).

### 3. Remove the Audio Head Unit

**Steps:**

1. Remove the **2 screws** securing the audio head unit.

2. Gently pull the unit forward and disconnect all wiring harnesses and antenna connectors.

---

# Touchscreen & Audio System – Installation Procedure Guide

## 1. Preparation and Safety

Before beginning the installation:

- Ensure the vehicle's **battery remains disconnected**.
- **Confirm all components** (wiring harnesses, brackets, fasteners) are available and undamaged.
- Keep the **trunk open** during the entire procedure to prevent accidental locking.

## 2. Install the Audio Head Unit

1. Connect all **wiring harnesses and antenna connectors** to the audio head unit.
2. Position the unit correctly and **secure it with 2 screws**.

## 3. Reconnect the Battery

1. Reconnect the **negative battery cable** and tighten using a **10mm socket**.

## 4. Verification

- Turn on the ignition and **check all systems**: touchscreen, control panel, and audio unit.
- Confirm proper functionality of **buttons, display, and sound** output.

## 5. Install the Touchscreen Assembly

1. Install the **touchscreen switchpack trim panel** (*Torque: 2.5 Nm*).
2. Position and secure the **trim panel** with **7 retaining screws** (*Torque: 2.5 Nm*).
3. Install the **trim panel retaining screw** (*Torque: 2.5 Nm*).
4. Fit the **upper trim panel**.
5. Fit the **lower trim panel**.

6. Secure the **2 retaining screws** for the lower trim panel (*Torque: 2.5 Nm*).
7. Close the glovebox and install the **retaining screw** (*Torque: 2.5 Nm*).

## 6. Install the Integrated Control Panel

1. Install the **trim panel** over the integrated control unit.
2. Secure it using the **2 retaining screws** (*Torque: 2.5 Nm*).
3. Close the glovebox and install the **retaining screw** (*Torque: 2.5 Nm*).

## 7. Reinstall Shared Interior Trims

1. Reinstall the **instrument panel side trim panel**.
2. Refit the **door seal**.

## 6. Final Steps

1. Ensure all **trim panels are flush and secure**.
2. Reposition the **carpet over the battery**.
3. Close the **trunk** and **raise the back seats**.
4. Reset the **clock** to the correct time
5. Start the engine and allow to idle until the engine reaches normal operating **temperature**..
6. Switch the **engine** off.
